

AMENDMENTS TO THE SPECIFICATION

(1) On page 1 of the specification, please replace the title “INPUT/OUTPUT SYSTEM” with the following:

BIOLOGICAL INFORMATION DETECTION SYSTEM

(2) On page 4 to page 5 of the specification, please replace the paragraph beginning “An input/output system” with the following amended paragraph:

An input/output system (or “biological information detection system”) according to the present invention includes a sheet-like input/output unit (or “sensor unit”) that includes wiring and a connection box that is attached to an edge of the sheet-like input/output unit, wherein the connection box includes a housing that is attached so as to sandwich the sheet-like input/output unit and internally encloses a circuit board that is connected to the wiring. The housing includes: a slit through which the sheet-like input/output unit passes and whose upper and lower edges are rounded or curved shape; and a means for fixing the sheet-like input/output unit that is disposed inside to the slit. The sheet-like input/output (input-output) unit may be a unit that performs only input or only output, or a unit that performs input and output. The input/output (input-output) system may be a system that performs only input or only output, or a system that performs input and output.
